## SEMI DOWN DRAFT (SDD)

VENTOLA ELICOIDALE DI ESTRAZIONE (STANDARD)

CON ESTRATTORE (OPTIONAL)

## Standard Specifications SDD

- \* Spray Booth Semi Down-draft fan depression in oblique to the work environment the Spray Booth is made up a room built in bending panel interlocking modular, the panels in polyurethane with tickness of 40 mm.
- \* Rear exhaust boxes h:700 (paint-stop filters in self-extinguishing material).
- \* Triple front door, orange pre-painted outside and white to 'inside of which having also a function of service door. With standard glass
- \* Ceiling partially filtering and vertical illumination on the side walls with 4 fluorescent neon, for each light unit (one per side per meter in length, and for the intermediate measurements there is the ceiling light).
- \* No plenum (frameworks only: half with filters and half with closed trays)
- \* Vertical lights on each lateral panel
- \* Control unit 122 model
- \* air speed 0,25 m/s
- \* Motors with power from 4 to 7,5 kw depending on the size of the Spray booth
- \* Extraction coil fan

**N.B. Generator NOT INCLUDED** (Prices for extractors see p. 4.2)

**N.B. Extractor NOT INCLUDED** (Prices for extractors see p. 4.2)

**IT DOES NOT REQUIRE ANY MASONRY WORKS OR METAL BASEMENT**

## GL1 50° - 60° SPRAY BOOTH

**WITH AGGREGATE GROUP: THIS GROUP ALLOWS TO MAKE THE TOTAL RECYCLING**

## Standard Specifications GL1

- \*Spray booth with lateral panels insulated by polyurethane; thickness of 40 mm the panels are pre-painted in white.
- \* Air expulsion on 2 rows of grids with frames and paint-stop filters
- \* Triple front door, orange pre-painted outside and white to 'inside of which having also a function of service door. With standard glass
- \* Ceiling filter, lighted up by two rows of two neon fluorescent ceiling lights inclination 30 °.
- \*Plenum 500
- \*Air regulating damper manually actuated for spraying phase and baking phase.
- \*Semi-automatic electric control unit that controls: light, motor, burner ( 122 control unit for GL1)
- \*air speed 0,25 m/s
- \*Motor from 4 Kw to 7,5 Kw depending on the spray booth's dimensions; fan
- Ventilation and heating group complete of inox steel hot water heater and 180.000 Kcal/h Riello Burner
- \*NO recycling
- \*Anti-vibration joint
- \* Support up to 18,000 / 20,000 mc / h

### ACCESSORIES INCLUDED

- \* Thermoregulator complete with probe for the temperature regulation
- \*contatore working hours
- \* safety thermostat (in case of temperature beyond the safety threshold)

**N.B. Extractor NOT INCLUDED** (Prices for extractors see pag. 4.23)

### GL1 WITH AGGREGATE GROUP

- \*Semi-automatic electric control unit that controls: light, motor, burner. 128 Control unit
- \*Aggregate Intake unit with total recycle
- \*Motor of 5.5 kw ADN 450 or 7,5 kw ADN 500, depending on the spray booth's dimensions.
- \*Ventilation and heating group complete of inox steel hot water heater and 180.000 Kcal/h Riello Burner
- \* Total recycling inclusive of ventilation head
- \* Support up to 18,000 / 20,000 mc / h

Packing in wood cases	+	<b>432,00</b>

## GL4 SPRAY BOOTH

## Standard Specifications GL4

- \*Spray booth with lateral panels insulated by polyurethane; thickness of 40 mm the panels are pre-painted in white.
- \* Air expulsion on 2 rows of grids with frames and paint-stop filters
- \*Three leaves front door prepainted in orange outside and white inside. One of them can be used also as service door.
- \*Totally filtering ceiling and vertical lighting on the lateral panels with for fluorescent neons per each ceiling light
- \*Plenum 500
- \*Air regulating damper electrically actuated by a servo control for spraying phase and baking phase.
- \*Semi-automatic electric unit control that controls: lights, the motor start up, fan and burner. 128 Unit control
- \*air speed 0,25 m/s
- \*Motor from 5,5 Kw to 11 Kw depending on the spray booth's dimensions;
- \*Ventilation and heating group complete of inox steel hot water heater and 180.000 Kcal/h Riello Burner
- \*NO recycling
- \*Anti-vibration joint

### ACCESSORIES INCLUDED

- \* Thermoregulator complete with probe for the temperature regulation
- \*contatore working hours
- \* Damper motor (generator)
- \*N°1 Safety solenoid valve
- \*N°3 of minimum and maximum pressure switches (pressure sensors in case of anomalies)
- \* safety thermostat (in case of temperature beyond the safety threshold)

**N.B. Extractor NOT INCLUDED** (Prices for extractors see pag. 4.23)

## POWERTHERM 60°-80° SPRAY BOOTH

### SPRAYING PHASE WITH EXTRACTOR (OPTIONAL)

### BAKING PHASE WITH EXTRACTOR (OPTIONAL)

## Standard Specifications POWERTHERM

- \*Spray booth with insulated panels made of polyurethane, with a thickness of 40mm the panels are pre-painted in white externally and internally
- \*Air expulsion on 3 rows of grid with frames and paint-stop filters.
- \*Adjustable framework
- \*Three-leaves front door pre-painted internally in white and externally in orange. One of them can also be used as service door
- \*Filtering ceiling and high lighting by two rows of ceiling lights with N. 4 fluorescent neons each, inclination 30°
- \*Plenum 500
- \*Air diffuser in the plenum
- \*Air regulating damper for spraying and baking phases, electrically actuated by a servo control
- \*Electric semi-automatic control unit that controls: lights, motor start up, fan and burner (mod. 128).

- \*aire speed 0,25 m/s
- \*Motors from 5,5 Kw to 11 Kw and turbine, depending on the spray booth's dimensions
- \*Ventilation and heating group inclusive of inox steel heater and 180.000 Kcal/h Riello diesel burner, single flame

- \*Reversed blades turbine fan with direct-coupled motor
- \*Total recycle during the baking phase
- \*Anti-vibration joint

### ACCESSORIES INCLUDED

- \* Thermoregulator complete with probe for the temperature regulation
- \*contatore working hours
- \* Damper motor (generator)
- \*N°1 Safety solenoid valve
- \*N°3 of minimum and maximum pressure switches (pressure sensors in case of anomalies)
- \* safety thermostat (in case of temperature beyond the safety threshold)

**N.B. Extractor NOT INCLUDED** (Prices for extractors see pag. 4.23)

## SPRINTEK SPRAY BOOTH

### SPRAYING PHASE

### BAKING PHASE

## Standard Specifications SPRINTEK

- \*Spray booth with thermal insulation in rock wool, with a thickness of 40 mm, the panels are pre-painted in white externally and internally.
- \*Air expulsion on 3 rows of grids with frames and paint-stop filters
- \*Adjustable framework
- \*Three-leaves front door, pre-painted orange externally and white internally. One of them can also be used as service door.
- \*Long windows
- \*Filtering ceiling and high lighting by two rows of ceiling lights with N. 4 fluorescent neons each, inclination 30°
- \*Plenum 750 mm and basement 400 mm
- \*Air diffuser in the plenum
- \*Air regulating damper for spraying and baking phases, electrically actuated by a servo control
- \*Electric semi-automatic control unit that controls: lights, motor start up, fan and burner (mod. 128)
- \*air speed 0,3 m/s
- \*Intake unit and extractor with motors of 11 Kw.
- \*Gruppo di ventilazione e riscaldamento a gas da 280.000 kcal/h
- \*Direct flame burner
- \*Total recycle during the baking phase
- \* Inverters (No. 2) with the preparation of the PLC control unit 128
- \*Anti-vibration joint

### ACCESSORIES INCLUDED

- \* Thermoregulator complete with probe for the temperature regulation
- \*contatore working hours
- \* Damper motor (generator)
- \*N°1 Safety solenoid valve
- \*N°3 of minimum and maximum pressure switches (pressure sensors in case of anomalies)
- \* safety thermostat (in case of temperature beyond the safety threshold)
- \*CO detector
- \*Bonnet hanger trolley and 2 corner tables

<b>EXIT</b>
N° 2 MOTORS
N° 2 FANS

## Standard Specifications EUROTEK

- \*Spray booth with thermal insulation in rock wool, with panels in rock wool with a thickness of 50 mm, the panels are pre-painted in white externally and internally.
- \*Air expulsion on 3 rows of grids with frames and paint-shop filters
- \* Three wings frontal door. One of the doors can be used as service door.
- \*Long glasses
- \*Filtering ceiling and high lighting by two rows of ceiling lights with N. 4 fluorescent neons each, inclination 30°
- \*Plenum 750mm
- \*Diffusore aria nel plenum
- \*Air regulating damper for spraying and baking phases, electrically actuated by a servo control
- \*Electric semi-automatic control unit that controls: lights, motor start up, fan and burner
- \*air speed 0,3 m/s
- \* CTA group a motor+fan for the air entering and a motor+fan for the air exiting. The motor can vary from 5,5 kw to 11 kw depending on the dimensions
- \*Endothermic panels 180°C on the lateral and rear sides and 350°C on the ceiling of the spray booth
- \*Adjustable pressure control
- \*Antivibration joint
- \*Soft start

### ACCESSORIES INCLUDED

- \* Thermoregulator complete with probe for the temperature regulation
- \*contatore working hours
- \*N°1 Safety solenoid valve
- \*N°3 of minimum and maximum pressure switches (pressure sensors in case of anomalies)
- \* safety thermostat (in case of temperature beyond the safety threshold)
- \*Soft start
- \*Bonnet hanger trolley and 2 corner tables

\*ROUNDED ANGLES AS OPTIONAL

## GL5 SPRAY BOOTH

## Standard Specifications GL5

- \*Spray booth with panels thermally insulated with polyurethane, thickness of 50 mm, the panels are internally and externally pre-painted in white.
- \*Esplulsione aria su 2 file di griglie (con op. murarie)
- \*4-leaves entering frobt door ( the service door is not included)
- \*Standard glass oblò
- \*Filtering ceiling and hiagh lighting by two rows of ceiling lights with N. 4 fluoescent neons each, inclination 45°
- \*Plenum 750
- \*Air regulating damper for spraying and baking phases, electrically attuated by a servo control
- \*Centralina standard industriale, elettromeccanica
- \*velocità 0,25 m/s
- \*Two/three intake unit groups with motors and fan depending on the spray booth's dimensions
- \*Ventilation and heating group inclusive of inox steel heater and Riello diesel burner 250.000 kcal/h
- \*NO recycling
- \*Anti-vibration joint

### ACCESSORIES INCLUDED

- \* Thermoregulator complete with probe for the temperature regulation
- \*contatore working hours
- \* Damper motor (generator)
- \*N°1 Safety solenoid valve
- \*N°3 of minimum and maximum pressure switches (pressure sensors in case of anomalies)
- \* safety thermostat (in case of temperature beyond the safety threshold)

## SPRAY BOOTH SUPER MINI

### TECHINICAL SPECIFICATIONS

width	1500
length	1000
air flow	2500 m3/h
motor power	0,55 kW

### STRUCTURAL STANDARD SPECIFICATIONS

Structure realized with galvanized first quality steel plate. System with modular panels fixed among them and sealed.

### FILTERS

The post is equipped with ANDREA filter that uses the principle of inertial separation

### MOTOR

3 Phase - 400 Volt - 50 Hz 4 poles with rotation speed of about 1450 turns per minute.

### LIGHTING

The lighting is warranted by light fixtures that can be supplied with neon 18 or 36 W.

### PROTECTION

A welded mesh finger guard protects the fan inlet and is retained by the fan fixing bolts.

## SELF-REGULATING HEATER

### RISCALDATORE AUTOREGOLANTE

TERMO 40°C

#### DESCRIZIONE GENERALE

Il riscaldatore autoregolante, ha un design robusto concepito per resistere a ritmi di utilizzo /produzione industriale. La scatola di derivazione con il grado di protezione IP66 è leggera e di lunga durata, fatta di materiale antiurto. La tubazione del fluido vettore (aria compressa o altri gas idonei per il processo lavorativo) risponde ai requisiti standard delle tubazioni già ampiamente utilizzate e presenti sul mercato. L'elemento riscaldante autoregolante, innovativo e brevettato è attualmente l'unico a garantire una temperatura stabile del vettore fluido della vernice non solo a monte, ma soprattutto a valle (all'aerografo) con l'esclusione di alcun tipo di regolazione della temperatura da parte dell'operatore. Inoltre, la temperatura preimpostata non subisce variazioni né di base alla temperatura esterna dell'ambiente, né in base alla pressione o la portata del fluido vettore.

#### GENERAL DESCRIPTION

The self-adjustable heating has a solid design conceived to withstand industrial use/production rhythms. The light and long-lasting connector block, made of shockproof material, has a protection degree IP66. The fluid vector pipes (as compressed air or other gas that fit the working process) answers the standard requirements of the pipes that have already been widely used and that are nowadays on the market. The innovative and patented self-adjustable heating is currently the only one granting a stable temperature of the fluid vector of the paint, not only at the beginning, but also at the end in particular. No particular adjustment of the temperature is required. Furthermore the preset temperature does not undergo alterations because of the outdoor temperature nor because of the pressure nor because the fluid vector range.

## Standard Specifications/Caratteristiche

DIMENSIONI/DIMENSIONS	160X140X50h + tubo aria /tubo de aire
CONSUMO ENERGIA/ENERGY CONSUMPTION	Ca. 1 A
TEMPERATURA DI ESERCIZIO/WORKING TEMPERATURE	autoregolante a 40°C +/- 10%
ALIMENTAZIONE ELETTRICA/POWER SUPPLY	230v 50hz (+/- 10%)
CORRENTE MASSIMA/MAXIMUM CURRENT: (AFFLUSSO ALL'ACCENSIONE / INFLOWING AT THE IGNITION):	3 A
PRESSIONE MASSIMA INDICATA/MAX PRESSURE SUGGESTED	8 Bar
PORTATA MASSIMA INDICATA/MAX CAPACITY SUGGESTED	400 lt/mm

#### VANTAGGIO

Migliore/ più agevole applicazione del materiale verniciante, riduzione dei rischi dovuti a fattori esterni temperatura dell'ambiente, miglioramento della distensione e adesione della vernice, riduzione drastica delle colature o l'effetto buccia d'arancia riduzione dei tempi di appassimento, riduzione dell'over spray, riduzione delle emissioni in atmosfera nocive.

#### ADVANTAGES

Easier varnishing, reduction of the risks due to external factors as an instance the outdoor temperature, an improvement of the paint draft and adhesion, a drastic reduction of smears or orange peel effect, reduction of purging time, reduction of over spray, reduction of the noxious emissions in the atmosphere.

## IONIZING AIR GUN

### PISTOLA IONIZZANTE

#### DESCRIZIONE GENERALE

La pistola ionizzante ha un design robusto e di lunga durata, ha la funzione di neutralizzare l'elettricità statica su diversi materiali e pulisce le superfici con l'utilizzo di aria compressa o altro gas. La pistola ionizzante, collegata all'impianto di aria compressa e collegata al proprio alimentatore a sua volta collegato alla corrente elettrica, produce un getto di gas ricco sia in ioni positivi che negativi. Direzioneano il flusso sul supporto carico di correnti elettrostatiche, esse vengono neutralizzate. Le correnti elettrostatiche, se consistenti, possono compromettere il risultato qualitativo dell'applicazione del materiale verniciante, in quanto il supporto elettrostaticamente carico ha la tendenza di attrarre le micro particelle di polvere fino alla loro adesione alla superficie appena verniciata.

#### GENERAL DESCRIPTION

The ionizing air gun has a solid and long-lasting design, and it's useful to neutralize the static electricity upon various materials and it cleans the surfaces by means of compressed air or other gas. The ionizing gun is connected to the compressed air plant and to its own feeder, that it is in turn connected to the electricity. The ionizing gun produces a gas jet full of both positive and negative ions. The gas jet is directed towards a material electrostatically charged and neutralizes it. The electrostatic current, if it is consistent, can damage the qualitative result of the paint material application, as the electrostatically charged material tends to attract the dust's micro particles making them adhere to the surface that has just been painted.

## Standard Specifications/Caratteristiche

DIMENSIONI/DIMENSIONS	160X80X70h
CONSUMO ENERGIA/ENERGY CONSUMPTION	300uA
TEMPERATURA DI ESERCIZIO/WORKING TEMPERATURE	0°C - 50°C
ALIMENTAZIONE ELETTRICA/POWER SUPPLY	230v 50hz OPPURE 110v
PRESSIONE MASSIMA INDICATA/MAX PRESSURE SUGGESTED	5 Bar
PORTATA MASSIMA INDICATA/MAX CAPACITY SUGGESTED	400 lt/mm

#### VANTAGGIO

Riduzione dell'over spray  
Migliore ricezione del materiale verniciante  
Eliminazione del richiamo delle polveri sottili verso il supporto (effetto calamita)

#### ADVANTAGES

Reduction of the over spray  
Easier varnishing  
The dust adheres no more to the coachwork (magnet effect)

## ASSO TRIS

Configuration to 30°C

Configuration to 40°C

Configuration to 50°C

## Standard Specifications/Caratteristiche

ASSO TRIS is a self-regulating patented heater, designed to meet the needs of operators/spray painters in **industry, automotive and marine industry**, providing a flow of compressed air (or other gas suitable for the coating materials application) at a certain stable temperature, **with a choice between no. 3 pre-set temperatures of 30° C, 40° C or 50° C**, acting simply on the no. 2 selectors on the junction box. In this way it ensures **instant supply of the carrier fluid at the desired temperature**, regardless of the conditions of the external environment, the flow rate and/or pressure of the paint carrier fluid. The selected temperature rests stable (at the spray gun) even if ASSO TRIS is on standby. ASSO TRIS is furthermore **equipped with a hose 13/19, with the terminal trait of 1,5 mt 8/14**.

GREEN ENERGY LAMP 01	GREEN ENERGY LAMP 02	Specifications		
		GREEN ENERGY LAMP 01		
		VOLTAGE Double insulation - it does not need any ground connection	230 V single-phase	
		POWER	1400 W (max avv. 1840 W)	
		AMPER	5,8 A (max avv. 8,0 A)	
		DIMENSIONS	920x920 mm	
		WEIGHT	12 Kg	
		PRICE		1.350,00
<p>A new way to dry the paint. The diffused infrared technology allows to dry a painted panel from a minimum distance (10 - 15 cm), improving the performances with a very low consumption. <b>Green Energy Lamp</b> is able to bring the temperature of the part to be dried till 70°C, if it is positioned at the right distance from the lamp.</p> <ul style="list-style-type: none"><li>➤ Lightness</li><li>➤ Easy to move</li><li>➤ It is not bulky</li><li>➤ It is gentle in the drying of the water-base grounds that usually can be damaged with the traditional IR lamps</li><li>➤ Low power: just 1,4 kW - 230 Volt single-phase</li><li>➤ Very big working area: 1m2</li></ul>				
		GREEN ENERGY LAMP 02		CARATTERISTICHE
		VOLTAGE Double insulation - it does not need any ground connection	230 V single-phase	
		POWER	1860 W ( max avv. 2300 W)	
		AMPER	7,7 A ( max avv. 9,9 A)	
		DIMENSIONS	920x1225

## ELECTRO MECHANICAL CONTROL UNITS

	<b>122 ELECTRO MECHANICAL CONTROL UNIT (FOR PREPSTATION)</b>  Control unit for prep station with 2 controls for lights (right-left), selector for recycle or aspiration plus start up and stop control.	<b>EURO</b>  <b>1.160,00</b>
	<b>122 ELECTRO MECHANICAL CONTROL UNIT, FOR INTAKE UNIT (FOR GL1)</b>  Control unit for spray booth or prep station with controls for intake unit and burner. It has: a thermoregulator to control the temperature, a control for lights (right-left), selector for spraying or baking, start up and stop. For a motor and a fan only.	<b>1.720,00</b>
	<b>128 ELECTRO MECHANICAL CONTROL UNIT , STANDARD FOR SPRAY BOOTH GL2-GL4-POWER THERM-SPRINTEK</b>  Standard control unit for spray booth. It has: controls for 2 motors (intake unit and extractor), control for lights (right - left), thermoregulator to control the temperature, spraying-baking selector, baking timer, total working counter, silk-screen printing with visualisation of what works (by use of led), on-off burner selector, start up and stop.	<b>2.840,00</b>
	<b>132 ELECTRO MECHANICAL CONTROL UNIT , WITH MAGNELIK FOR PRESSURE CONTROL, OPTIONAL FOR SPRAY BOOTH GL2-GL4-PW-SPRINTEK</b>  It has: controls for 2 motors (intake unit and extractor), control for lights (right - left), thermoregulator to control the temperature, spraying-baking selector, baking timer, total working counter, silk-screen printing with visualisation of what works (by use of led), on-off burner selector, start up and stop and magnelik to control the pressure.	<b>3.250,00</b>
	<b>ELECTRO MECHANICAL CONTROL UNIT, STANDARD FOR GL5</b>  Standard control unit for spray booth GL5. It has: controls for 4 motors ( intake unit and extractor), controls for lights (right-left), thermoregulator to control the temperature, spraying-baking selector, baking timer, total working counter, silk-screen printing with visualisation of what works (by use of led), on-off burner selector, start up and stop, magnelik to control the pressure. IP 55 (protections from dusts and water jets).	<b>5.616,00</b>
	<b>STANDARD ELECTRO MECHANICAL CONTROL UNIT FOR ENDOTHERMIC PANELS AND SPRAY BOTH EUROTEK</b>  With 4 different controls for right-left, rear and ceiling panels. Spraying-baking-preparation phases. Magnelik to control the pressure and control for right-left lights.	with Soft Start <b>14.000,00</b> with Inverters + <b>4.800,00</b>
<b>OPTIONAL FOR SPRAY BOOTH GL2-GL4-POWER THERM-SPRINTEK IN REPLACEMENT UNIT 128</b>		
Difference electromechanical control units for preparation plc for 128/132 inverter (larger box)		+ <b>516,00</b>
<b>INVERTER (It takes two for each unit)</b>		cad + <b>2.400,00</b>
Difference for predisposition PLC for electromechanical control panel (128/132) with 2 inverters		+ <b>5.316,00</b>
Difference for control to be considered in case of direct flame		+ <b>1.020,00</b>

The above data are not binding and the company may make changes in its sole discretion

## DIGITAL CONTROL UNTIS

CLEVER CLURE ITM (WITH INVERTERS)		EURO
	Digital control unit with automatic working cycle (preparation - spraying - drying - 1st baking - 2nd baking - cooling), if it is used with inverter it is possible to save the 10% about the working cycle energy and the pressure is regulated automatically.	11.200,00
PLC "TOUCH SCEEN" CONTROL UNIT		
	Digital control unit 7 inches, as the itm one + possibility of settin 9 differents programs - visualisation of fiters conditions with helpline optional, active and historic alarm visualisation. With inverters (can be used only with inverter system)	11.200,00
PLC "TOUCH SCEEN" CONTROL UNIT FOR ENDOTHERMIC SPRAY BOOTH		
	Digital control unit 7 inches, as the itm one + possibility of settin 9 differents programs - visualisation of fiters conditions with helpline optional, active and historic alarm visualisation. With inverters (can be used only with inverter system)	16.800,00
"TOUCH SCEEN" OPTIONAL		
	Difference to PLC unit "Touch screen" 10 inches	1.400,00

## ACCESSORIES

THERMOREGULATOR		EURO	MOTOR FOR SHUTTER		EURO
	Thermoregulator inclusive of probe for regulating the pressure during the spraying and baking phases	140,00		Modulating actuators 3 POINTS AND ON/OFF 2 POINTS	140,00
TIMER			SAFETY ELECTRO-VALVE		
	The timer shows the working hours of the spray booth	60,00		Air electro-valve and coil to stop the compressed air when the system is not working or during the baking phase.	133,00
MAGNELIK			SPRAY CONTROL		
	It shows the internal pressure of the spray booth (display only)	300,00		When the operator does not use the air gun for a minute, it makes the spray booth move to the preparation phase with the employment of the motors at 50%	619,00
			<i>To be supplied only in case of inverter</i>		
ALARM FLASHING			MIN-MAX PRESSURE SWITCH AND FILTRS CLOGGING		
	(itm-touch sceen) Green flashing = stopped system Yellow flashing = the system is working Red flashing = breakdown Warnig buzzer for breakdown	350,00		Pressure collector that intervenes in case of anomalies	60,00

ACCESSORIES						
	SAFETY THERMOSTAT		EURO	INCLINED COLUM MANOMETER		
	Safety device that intervenes in case that the temperature exceeds the safety threshold		60,00		It shows the pressure in H2O mm till the 40% and regulates the pression	88,00
	CO DETECTOR		1.324,00		INVERTER	
	CO detector that stops the burner in case of bad combustion				Frequency control that allow to save energy till the 40% and regulates the pression automatically (with itm and touch screen control units). N°2 for each control unit	2.400,00
	ATEX CO DETECTOR		1.545,00		LEL SOLVENT DETECTOR	
	CO detector that stops the burner in case of bad combustion				It detects the solvents inside the spray booth to be set for the xylene	1.718,00
	Atex rules Direct flame only					
	METHANE AND GAZ DETECTOR		1.160,00		PTC PROBE	
	Methane and gas detector				PROBE TO DETECT THE TEMPERATURE	60,00
	PT 100 PROBE		80,00		ALARM	
	For touch screens that have been manufactured before november 2012 probe to detect the temperature				Mounted on the front door	180,00
	ALARM		300,00		SPEED AIR 0,3 m/s INTO THE SPRAY BOOTH	
	Mounted on the control unit				DIFFERENCE FOR AIR SPEED 0,3 m/s	1.250,00
					only for modification generator

## BURNERS - HEAT EXCHANGER

### DIESEL BURNER

DESCRIPTION	EURO
Diesel burner 90.000 Kcal/h single flame	1.360,00
Diesel burner 180.000 Kcal/h single flame	1.800,00
Diesel burner 200.000 Kcal/h double flame	2.440,00
Diesel burner 220.000 Kcal/h double flame SvizzeraBlu	4.400,00
Diesel burner 250.000 Kcal/h single flame	1.920,00
Diesel burner 250.000 Kcal/h double flame	2.500,00
Diesel burner 300.000 Kcal/h double flame SvizzeraBlu	4.800,00
Diesel burner 340.000 Kcal/h double flame	2.760,00
Diesel burner 420.000 Kcal/h double flame	3.440,00

### METHANE GAS OR GPL BURNER

DESCRIPTION	EURO
methane gas or GPL burner 90.000 Kcal/h single flame	2.860,00
methane gas or GPL burner 180.000 Kcal/h single flame	3.280,00
methane gas or GPL burner 180.000 Kcal/h double flame	4.500,00
methane gas or GPL burner 280.000 Kcal/h single flame	3.640,00
methane gas or GPL burner 280.000 Kcal/h double flame	4.720,00
methane gas or GPL burner 320.000 Kcal/h double flame SvizzeraBlu	7.000,00
methane gas or GPL burner 340.000 Kcal/h double flame	5.400,00
methane gas or GPL burner 410.000 Kcal/h double flame SvizzeraBlu	7.600,00
methane gas or GPL burner 450.000 Kcal/h double flame	6.240,00

### DIRECT FLAME BURNER

DESCRIPTION	EURO
Direct flame burner 180.000 Kcal/h	7.720,00
Direct flame burner 280.000 Kcal/h	8.000,00
Direct flame burner 380.000 Kcal/h	8.640,00
Direct flame burner 440.000 Kcal/h	12.200,00

### HOT WATER BATTERY + 3-WAYS VALVE

DESCRIPTION	EURO
Difference for hot water heating battery for spray booth 6,75x4x2,5-2,8	+ 4.870,00
Difference for hot water heating battery for spray booth 7x4x2,5-2,8	+ 5.180,00
Difference for hot water heating battery for spray booth 7,5x4x2,5-2,8	+ 5.340,00

### ELECTRIC BATTERY

DESCRIPTION	EURO
Difference for electric battery IP 44 for spray booth 6,75x4x2,5-2,8 + diff. control unit	+ 11.374,00
Difference for electric battery IP 44 for spray booth 7x4x2,5-2,8 + diff. control unit	+ 11.374,00
Difference for electric battery IP 44 for spray booth 7,5x4x2,5-2,8 + diff. control unit	+ 14.978,00
Difference for electric battery IP 55 for spray booth 7x4x2,5-2,8 + diff. control unit	+ 17.595,00
Difference for electric battery IP 55 for spray booth 7,5x4x2,5-2,8 + diff. control unit	+ 17.595,00

## ACCESSORIES AND SPARE PARTS FOR SPRAY BOOTHS

### HEAT EXCHANGERS- FANS

#### HEATER WITH DOUBLE TURNS OF SMOKE

DESCRIPTION	EURO
Heat exchanger with double turns of smoke 80.000-100.000 kcal/h	1.400,00
Heat exchanger with double turns of smoke 120.000-140.000 kcal/h	1.596,00
Heat exchanger with double turns of smoke 150.000-180.000 kcal/h	2.100,00
Heat exchanger with double turns of smoke 180.000-250.000 kcal/h	2.544,00
Heat exchanger with double turns of smoke 280.000-300.000 kcal/h	2.940,00
Heat exchanger with double turns of smoke 300.000-400.000 kcal/h	3.520,00
Heat exchanger with double turns of smoke 200.000 kcal/h for POWERTHERM	2.596,00
